

PMA PRESCHOOL CHALLENGE

2023

TWO OPTIONS:

- **Sharing a mathematical learning story**
- **Reflecting on your adventures as a Maths educator**

OPTION ONE: Send in a “mathematics or numeracy learning story” that highlights an important mathematical learning for a child/group of children.

OPTION TWO: Think about an aspect of your mathematics/numeracy learning and teaching that you have been “tweaking” this year. Write a short reflection that addresses these questions:

- **What was your provocation?** What challenge were you trying to resolve? What made you try something different?
 - **What did you try?** Why did you choose this action?
- **How did it go?** How did the children react? What did you notice was different for them? What did you notice changing in your own learning and teaching behaviours and practices?
 - **What does it mean for the future** of your mathematics intentional learning and teaching through play

Your reflection would be due by 5pm next Monday 23rd October! Email it to primarymathsPD@bigpond.com – make sure you include your name and site.
