

## PMA LEARNING CHALLENGE

### TERM 3, WEEK SIX

Choose and INVESTIGATE one or more of the questions below and THEN SHARE YOUR THEORIES AND JUSTIFICATIONS WITH US 🗣️

### ROYAL ADELAIDE SHOW – PART ONE

**CHALLENGE TWO** : The Royal Adelaide Show has been held since 1844. We would like you to investigate how many “Shows” have been held in South Australia since then. This would include “Country Shows” as well as the City Shows”. Represent your theory about how many and your evidence to justify your thinking.

**CHALLENGE THREE** – What would be the most efficient route to visit every “Show” in South Australia? Represent your theory about which route, what “efficient” meant to you and your evidence to justify your thinking.

**CHALLENGE FOUR** – There has been lots of “media coverage” of the cost of entry to the Show this year. We would like you to investigate the cost of entry for different people and whether you think this is reasonable. Will be people be able to afford to attend this year? Represent your theory and your why.

**CHALLENGE ONE:** How popular is either the “Royal Adelaide Show” or your local “Show”? Why, why not?

Use the “data collection” process to investigate the question – then tell us your theory and your evidence!

\*\*\*

\*\*\* Remember to grab the “Producing Data” Thinking Questions poster for Challenge 1
