

PMA LEARNING CHALLENGE

TERM 1, WEEK ONE

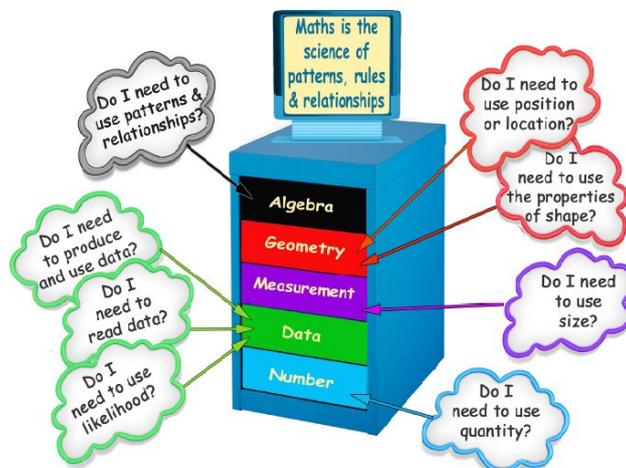

Welcome back to your 2023 learning year!

INVESTIGATE the questions below and **THEN SHARE YOUR THEORIES AND JUSTIFICATIONS WITH US** 🗣️

At school this year you are going to learn how to be and become an even more powerful mathematician in 2023!

Do you think you also had to think and act as a mathematician over your holiday break?

Mathematicians invented five different parts of mathematics – this diagram shows them as a set of drawers.

Learning Journeys

Explain your theory to us and justify it... Did you think and act as a mathematician in the holidays or not? If you did, which “drawers” of mathematics did you use? Which drawer did you use most? Will you use “drawers” of mathematics now you are back at school? Why/why not?
