

Week 6, Term 4 PMA Challenge

Time is passing quickly...

How much learning time do you have left this year?

Investigate and then share with us:

- How you worked it out
- Why you think yours is a valid calculation
- The actual learning time that is left, calculated in three different units of time

Is it the same for every child at school? Is it the same for every adult at school?

Will it feel fast or slow for you? Why?
